LS9000 10" True Low Air Loss Mattress System with Pulsation

Item #	Product Description	Product Dimensions	Product HCPCS	UOM
LS9000	True Low Air Loss Mattress System	36" (W) X 80" (L) X 10" (H)	E0277	1/ea

- The LS9000 system offers an extraordinary therapeutic mattress system for the prevention and treatment of pressure ulcers.
- The Powerloft Pro 900 pump produces 1180 liters of air flow per minute offering a cool and dry sleeping surface.
- The 10 Adjustable Comfort Settings allows pressure to be customized to patient's weight.
- The Auto-Firm feature allows for a two minute fill rate.
- The exclusive Pulsate mode reduces the air flow every 30 seconds to 50% of the comfort setting. This feature will intermittently reduce pressure and increase blood flow.
- The internal pressure control sensor continuously monitors surface pressure for optimal pressure redistribution.
- For use in the Homecare, Long Term Care, and Acute Care Markets.
- Power outage protection with 2" foam base.
- Static function can suspend the pulsate mode.
- Visible and audible alarms with Alarm Mute feature
- CPR valve allows for rapid deflation.
