- The ultimate in the industry for multi-layered die-cut foam and true memory foam, available with or without raised side rails.
- Mattress includes a tapered heel slope and channel cut center layer of foam under the entire lower leg to offload heels and prevent heel pressure ulcers.
- Top layer is full-length open-cell visco-elastic memory foam.
- Bottom layer provides full length horizontally scored articulation cuts extending the durability and life of the mattress significantly.
- Stretch cover is fire retardant, fluid and tear resistant, low shear and easy to clean.
- High Density Foam Perimeter provides solid edge support and facilitates safe patient transfers.
