DeVilbiss
HEALTHCARE

Drive DeVilbiss Healthcare offers a comprehensive line of Long Term Care products designed to exceed resident requirements for comfort and functionality and **surpass customer expectations for high quality, selection and value.**

Our broad line includes standard Long Term Care & Bariatric Beds, Resident Room Furniture that is both attractive and practical, Pressure Prevention products that meet a wide range of clinical demands, Multi-Position Recliners, Wheelchairs, Bathing Systems, Bath Safety, Respiratory, and Mobility aids just to name a few.

We strive to be your sole source supplier for all your facilities resident care needs.

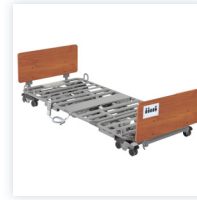

Looking for a full feature, low height, long term care bed designed to meet residents that need, or desire, **a little more elbow room for comfort and dignity?**

The Drive DeVilbiss Healthcare PrimeCare Model P902 will deliver those features and much more. The additional benefits for staff and caregivers are a more workable surface area for repositioning, care and treatment. The P902 bed performs double duty as an entry- level bariatric bed with 500 lb.* capacity and optional 42” expansion capability.

The PrimeCare P902 will meet and exceed the rigorous challenges of resident care in today’s Long Term Care facility. Drive DeVilbiss Healthcare strives to develop and produce a complete and functionally superior cost effective product while maintaining “Best in Class” standing. This can be described in three words that are synonymous with Drive DeVilbiss Healthcare: Quality, Performance and Value!

PrimeCare Model #P902

FALL MITIGATION

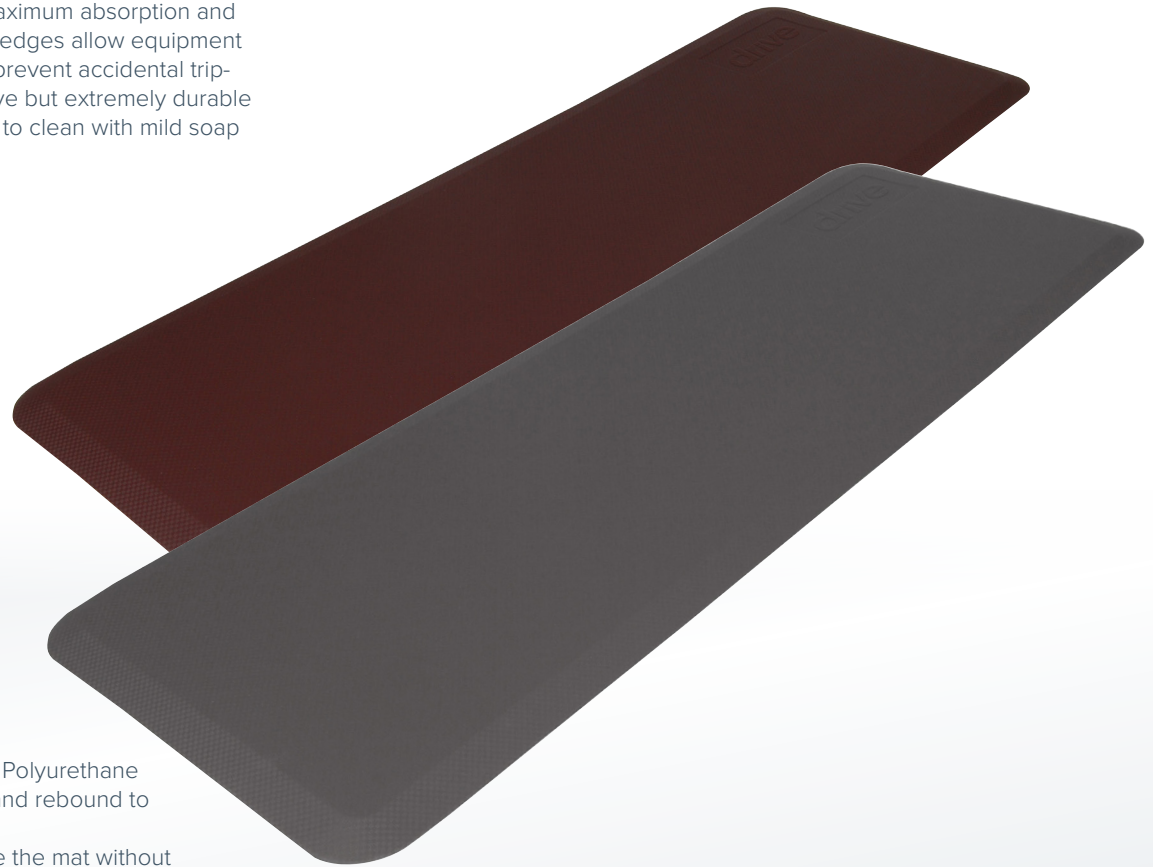

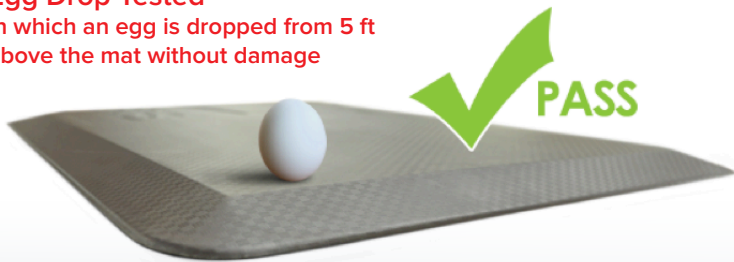

PrimeMat 2.0 Impact Reduction Fall Mats

The PrimeMat 2.0 is the ideal choice as part of a comprehensive fall prevention program for providing a safe environment for patients at high risk of falling out of bed.

High quality molded Polyurethane foam inner core construction provides maximum absorption and rebound to reduce impact in the event of a fall. The mat's tapered, beveled edges allow equipment to roll over with ease and its non-slip bottom keeps the mat secure to help prevent accidental tripping. The embossed non-slip PVC leather-look top cover is not only attractive but extremely durable and puncture resistant. Non-slip pattern helps minimize slipping and is easy to clean with mild soap and water.

Egg Drop Tested

In which an egg is dropped from 5 ft above the mat without damage

Features

- Full 72" length provides maximum coverage alongside bed.
- Tough and lightweight - Mats are constructed from high quality molded Polyurethane foam inner core (210kgs/cubic meter) to provide maximum absorption and rebound to reduce impact in the event of a fall.
- Passed 5 foot "Egg Drop Test"—an egg was dropped from 5 feet above the mat without damage.
- Low Profile with tapered edges allow equipment such as overbed tables or patient lifts to roll over easily.
- Anti-slip bottom netting keeps the mat secure to help prevent accidental tripping.
- Embossed non-slip PVC leather look top is not only attractive but extremely durable and puncture resistant.
- Non-slip pattern helps minimize slipping and is easy to clean with mild soap and water
- Available in two colors; Brown & Gray
- 1 year warranty.

PATIENT LIFTS

Battery-Powered Patient Lift with 6-Point Cradle

Optional Rechargeable,
Removable Battery Available

Features

- Heavy-gauge construction.
- Jumbo actuator pump with emergency button can switch to manual mode to lower patient down safely.
- Fast, easy charge from AC outlet.
- To charge, simply plug in unit. Battery does not need to be removed to be charged. Lift will not operate while plugged in. For home-care use.
- Audible warning when battery power falls below 50%

Item #	Description
13240	Battery-Powered Patient Lift with 6-Point Cradle
13242	Battery-Powered Patient Lift with 6-Point Cradle and Rechargeable, Removable Battery

Bariatric Battery-Powered Patient Lift with 4-Point Cradle

Optional Rechargeable,
Removable Battery Available

Features

- 600 lb. weight capacity. (Can fit under bed)
- To charge, simply plug in unit. Battery does not need to be removed to be charged. Lift will not operate while plugged in. Ideal for home-care use.
- Jumbo actuator pump with emergency button can switch to manual mode to lower patient down safely.
- Base legs adjust easily and lock securely into open position with padded shifter handle.
- Extra wide coated cradle with 360° rotation with 4-point hook up.

RECLINERS

3 Position Recliner

3 positions: upright, deep recline and elevated leg rest/footrest.

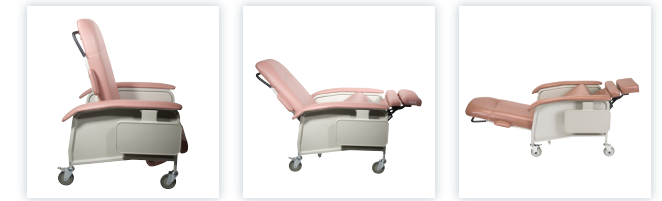

Features

- Retractable lock bar secures the chair in the desired position.
- Self-adjusting suspension in the seat prevents bottoming out.
- Side panels "pop off" for easy cleaning and maintenance.
- Large, blow-molded tray locks in 5 positions and can be stored on the side of the chair.
- 5" casters (2 with locks) make it easy to move and secure the recliner.
- Wide, comfortable armrests are angled to provide support in any reclined position.
- Neutral-colored, sturdy steel frame is easy to clean and maintain.
- Moisture barrier on seat prevents seepage.
- Comfortable built-in headrest.
- Foam and vinyl meet California Technical Bulletin 117.

Patient Room RECLINERS

Clinical Recliner

4 positions: upright, TV, full recline and Trendelenburg

Features

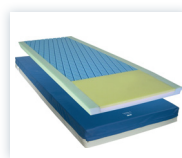

- Ideal for use in dialysis, blood collection, respiratory and cardiac care.
- Chair can be positioned in 4 positions—upright, TV, Full Recline and Trendelenburg.
- Deep recline and Trendelenburg position can only be attained by an attendant.
- Gas cylinder controls deep recline and Trendelenburg position.
- Side panels “pop-off” for easy cleaning and maintenance.
- Large, blow-molded side trays include recess for cup.
- 5” Casters (2 with locks) make it easy to move and secure recliner.
- Gas cylinder release handle for quick back release. Release handle can be operated from either side of the recliner.
- Wide, comfortable armrests are angled to provide support in any reclined position.
- Upholstered arm supports provide extra comfort in recline position.
- Neutral-colored, sturdy steel frame is easy to clean and maintain.
- Comfortable built-in headrest.
- Foam and vinyl meet California Technical Bulletin 117 Standard.

PRESSURE PREVENTION

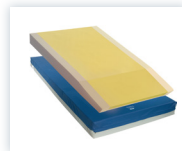

Gravity 7, 8, 9 Long Term Care Pressure Redistribution Mattresses

Gravity 7

Gravity 8

Gravity 9

Features

- Bottom layer provides full length horizontally scored articulation cuts extending the durability and life of the mattress.
- Stretch covers are fluid proof with moisture vapor permeability, tear resistant, low shear, easy to clean, anti-microbial and fire retardant.
- High Density Foam Perimeter provides solid edge support and facilitates safe patient transfers.

Gravity 7

- Cost-effective option maximizes value and comfort with 3 full layers of foam available with or without raised side rails.
- Top layer uses unique die-cutting and a true memory foam heel section to optimize zoned pressure redistribution.
- Warranty: 7 Years; Weight Capacity 300 lbs.

Gravity 8

- Outstanding combination of multi-layered die-cut and memory foam available with or without raised side rails.
- Mattress includes a 6" to 5" heel slope and a "channel cut" center layer of foam under the foot section to target heel ulcer prevention.
- Warranty: 10 years; Weight Capacity 350 lbs.

Gravity 9

- The ultimate in the industry for multi-layered die-cut foam and true memory foam, available with or without raised side rails.
- Mattress includes a 6" to 4" heel slope and a "channel cut" center layer of foam under the foot section to target heel ulcer prevention.
- Top layer is full-length open-cell visco-elastic memory foam.
- Warranty: 15 Years; Weight Capacity 450 lbs.

PRESSURE PREVENTION

Med-Aire Plus - Advanced Digital Low Air Loss and Alternating Pressure Mattress System

Available in standard width with or without defined perimeters and in multiple bariatric sizes.

(14029 Shown)

Features

- This combination therapy system provides both alternating pressure and low air loss to optimize pressure redistribution and manage skin maceration.
- Designed to prevent, treat and manage pressure ulcers in the home, long term care, or acute care setting.
- Cell-on-cell design of 8" - 10" deep air cells prevents "bottoming out" and also provides at least 24 hours of power outage protection.
- Advanced Clinical and Care Giver Features: Auto-Firm, seat inflate, auto-recovery, microprocessing feedback, lock-out and more!
- Digital pump allows for customization to individual patients' comfort and safety needs, and will auto return to alternating pressure mode if system is left on static mode for >2 hours.
- Deluxe 4-way stretch cover is low shear, fluid-resistant, vapor permeable, quilted and zippered.
- Each one of the 20, 8" - 10" deep air bladders are easily removed and replaced.
- Pillow function maintains the 3 air cells at the head of the bed in static mode for patient comfort.
- 3 diagnostic alarms tell you whether a problem is with the mattress or the pump for more efficient servicing.
- CPR valve allows for rapid deflation.
- EZ Lock/Quick Release Tubing connector.

PRESSURE PREVENTION

Med-Aire Assure (14530) and Med-Aire Essential (14508) 8" Low Air Loss and Alternating Pressure Mattress System

One control unit powers your choice of 2 Low Air Loss and Alternating Pressure Mattress Systems

(14530 Shown)

Features

- Combination therapy mattress system provides both alternating pressure and low air loss to optimize pressure redistribution and manage skin maceration.
- Designed to prevent, treat and manage pressure ulcers in the home or long term care setting.
- Med-Aire Assure 14530 incorporates a system of (18) 5" individual bladders over a 3" foam base and the Med-Aire Essential incorporates a system of (18) 8" deep individual bladders.
- Pump offers a static feature as well as adjustable comfort settings by patient weight.
- Removable cover is quilted for comfort, low shear, anti-microbial, water-resistant and vapor permeable.
- CPR valve allows for rapid deflation.

Pure Oxygen Concentrator

Features

- The Pure Oxygen Concentrator is an easy to use, service, and maintain 5L concentrator that will have patients, referral sources and delivery technicians thanking you.
- Simple user interface with easy to view and operate power switch, LED indicator lights, and flow selector.
- Simple humidifier bottle connection.
- Superior mobility with top handle, easy roll casters, and minimal weight.
- Easy to connect transfill port on oxygen sensing units.
- Simple single door access to both the foam and the HEPA filter.
- Exhaust system design directs airflow away from the user and reduces noise.

Item #	Description
CH5000S	Pure Oxygen Concentrator with Sensor
CH5000	Pure Oxygen Concentrator without Sensor

DeVilbiss iFill® Personal Oxygen Station

Features

- Fills M6 cylinders in just a little over an hour – not the two hours or more that it can take with other in-home oxygen filling units; shorter fill times save energy costs
- Easily tops off partially-filled cylinders
- Automatically shuts off when filling is complete
- Choice of cylinders – Standard 870 Post Valve, DeVilbiss PulseDose® Oxygen Conserving Device or Continuous Flow regulator
- Simple 3-step operation- Fills iFill proprietary cylinders
- Can be placed and used virtually anywhere in the home, minimizing noise and disruption to daily life
- Intuitive design is easy to use—simply align the cylinder's nipple connector with the fill connector on the unit and click into place
- Casters make iFill easy to move and store when not in use
- Control panel light signals when cylinder is filling and when it's full
- Large cylinder release ring is designed for individuals with limited dexterity; requires little pressure to depress.

Item #	Description
535D	DeVilbiss iFill® Station

DeVilbiss 5 Liter Oxygen Concentrator

Features

- Assembled in the USA
- Exclusive DeVilbiss OSD® (Oxygen Sensing Device) standard on every unit — increases accuracy and reliability for longer service intervals
- Readily accessible patient controls and protected cannula fitting
- Three-year dealer service interval*
- Recessed humidifier nook prevents damage
- Easy to assemble/disassemble two-piece cabinet for ease of maintenance
- Lockable flow meter
- Convenient top and side handles for easy transport
- Accommodates up to a 50-foot cannula (15.3 meters)
- Three Year Warranty

Power Neb Ultra Nebulizer with Disposable and Optional Reusable Neb Kit

Features

- Our smallest compressor neb weighs in at a mere 3.2 lbs. and provides a competitive edge price point for providers.
- Built-in neb kit holder for hands-free use.
- Delivers consistent particle size of <5 microns and fast treatment times.
- Complete with disposable neb kit.
- Powerful piston pump is efficient, dependable and quiet.

18080	Power Neb Ultra with Disposable Neb Kit
18081	Power Neb Ultra with Disposable and Reusable Neb Kit

CHAD 50 PSI Compressor

Features

- Designed for efficient, continuous high-pressure performance.
- Ultra-powerful compressor for both humidification and high flow, high-pressure nebulization of viscous medications.
- Optimizes medication delivery by aerosolizing to a particle size of < 2 microns.
- Lightweight, durable and easy-to-clean design.
- Detachable door protects componentry.

CONSERVERS

CHAD® Bonsai® Velocity Pneumatic Oxygen Conserver

Features

- Delivers a uniform oxygen pulse at increments: 1, 2, 3, 4, 5 and 6.
- Two continuous flow (CF) settings preset @ 2 LPM and 4 LPM.
- Delivers up to a 6:1 savings ratio from 14-40 breaths per minute.
- Senses a breath/delivers oxygen in the first half of the inspiratory cycle.
- Operating pressure range: 200-3000 PSI.
- Light weight and quiet operation.
- Easy to operate single selector knob.
- Compact design fits easily in virtually any oxygen carry bag.

SmartDose® Mini Auto-Adjusting Oxygen Conserver

Features

- Delivers a uniform oxygen pulse at increments: 1, 2, 3, 4, 5 plus CF present @ 2 LPM.
- Continuously monitors breathing patterns and adjusts oxygen dose to match activity level.
- Achieves maximum conservation efficiency by automatically adjusting the dose down when less oxygen is needed.
- Delivers a quiet, gentle dose of oxygen using an efficient and compact design.
- Allows delivered dose to increase up to 2 settings during patient exertion up to a maximum pulse dose setting of 7.
- Can use 2 AA Alkaline or 2 AA rechargeable batteries for a duration of about 1 year for most patients.*
- Operating pressure range: 500 – 3000 PSI.
- Weighs just 15.5 ounces with batteries.
- Auto shut-off feature conserves battery life.
- Fits easily in virtually any carry bag.

Item #	Description
OM-812	CHAD® Bonsai® Velocity Pneumatic Oxygen Conserver
CTOX-MNO2	SmartDose® Mini Auto-Adjusting Oxygen Conserver

REGULATORS

15 lpm Regulator CGA 870 Connection

15 lpm Elongated Regulator for Humidifier

15 lpm Regulator CGA 540 Connection

Features

- Our regulators feature a protective contents gauge and a built-in pressure relief valve for safety.
- Mini regulators offer the same function as standard regulators while facilitating an easier fit into oxygen carry bags.
- Easy to operate single selector knob.
- Lightweight and durable design.
- Meet or exceed accuracy standards for ASTM, American National and CGA.
- Inlet Pressure: 300 - 3,000 PSI.
- Outlet pressure: 50 PSI.
- UL Approved.

Item #	Description
18302GN	15 lpm Regulator, 0-15 lpm, Barb Outlet, CGA 870 Connection
