

MOVING REHABILITATION FORWARD™

Patient Lifts | 2013

INTRODUCTION

Chattanooga is the world's largest manufacturer of rehabilitation equipment for treating musculoskeletal, neurological and soft tissue disorders. For over six decades, Chattanooga has set a benchmark for leadership, reliability and excellence. Our products contribute to better treatment outcomes in hospitals, clinics and home settings worldwide. We lead the rehabilitation industry by example, and through continuous innovation, provide real world solutions for clinicians and their patients.

As the world's leading brand in rehabilitation, Chattanooga is sold in over 80 countries worldwide. Chattanooga distributors and customers are supported by a highly trained and seasoned team of personnel who oversee new product development, product training and education, order placement, product delivery, and after sales service in addition to providing dedicated sales and marketing support.

Chattanooga is a brand of DJO Global Inc. DJO Global provides solutions for musculoskeletal health, vascular health and pain management. Our products help prevent injuries or rehabilitate after surgery, injury or from degenerative disease, enabling patients to regain or maintain their natural motion.

Alliance™ Patient Lifts

Alliance™ Patient Lifts, Slings and accessories provide the utmost in safety, comfort and affordability to caregivers and patients. Their ergonomic design makes transfers as simple as possible for patients who are able to bear partial weight. Alliance HE lifts feature robust construction and are easily upgradeable from hydraulic to battery-powered at an affordable price and with no tools required.

Alliance Stand Aid

The Alliance Stand Aid is a transport assist unit which keeps residents active and engaged in the lifting process. Transport is quick and requires minimal caregiver assistance.

Unit weight: 60 lbs (28 kg)

Front Base: 4.3" (11 cm)

ALLIANCE STAND AID**Alliance Stand Aid**

The Alliance Stand Aid is a transport assist unit which keeps residents active and engaged in the lifting process. Transport is quick and requires minimal caregiver assistance. Users simply grasp the middle bar and pull themselves up. A padded split seat swings out for loading or unloading then swings back to form a comfortable, secure seat for transport. It is an excellent alternative to a wheelchair for easier commode access.

- 400 lb (181 kg) safe working load
- Dual knee pads for secure transports
- Sturdy, yet easily fits through narrow doorways
- Affordable alternative to electric stand aids
- Optional safety belt for user confidence
- Choice of single or dual seat locks

Optional Safety Belt

ALLIANCE STAND-ASSIST PATIENT LIFT

FEATURES

Alliance Stand-Assist Patient Lift

- 400 lb (181 kg) safe working load
- 600 lb (272 kg) safe working load also available for bariatric patients
 - Stand-Assist Heavy Duty Patient Lift (REF: 1907)
- Interchangeable battery systems feature audible low battery warning
- Foot pedal base opening for wheelchair/commode access
- Large, easy-to-grip handles for superb maneuverability
- Low base height provides maximum stability

A Alliance Stand-Assist Sling

Soft support panels under the arm and lumbar area for added comfort. The unique crossover strap and non-slip inner pad ensure the sling stays in place and does not ride up during lifting. An optional buttock support strap is available for initial lift assistance. Available in padded only

B Alliance Toileting Sling

Provides unobstructed access to the perineal area and easier clothing adjustments than standard commode opening style slings. Available in padded only. 400 lb (181 kg) max
